Entry level/Junior

I have dedicated nearly a year to mastering web development principles and frontend skills. My journey has been enriched through a multitude of online courses and reference materials. I've successfully completed a comprehensive course on HTML/CSS and JavaScript, as well as a specialized React course on Coursera. My focus has been on React, as it has been my preferred framework for the majority of my projects. My goal is to transition into the job market with a primary emphasis on gaining practical experience and further advancing my skill set.
